

The Ultimate Solution for

Innovative Software for the Petroleum Industry

CYBERMAC Petroleum industry Software

CyberMAC® Petroleum software streamlines the order and fulfilment process, and reduces the manual input of multiple data to one element – your customer's orders. **CyberMAC®** takes care of the rest by synchronizing with the fuel-price database, then automatically producing all the necessary operational, customer, billing and accounting documentation needed to fulfil your customer orders.

Once you enter your customer orders, **CyberMAC®** will produce all the necessary forms you require to track, bill, and properly account for each gallon sold, while calculating the precise appropriate tax calculations for each purchase.

CyberMAC® will issue a corresponding purchase order to each vendor based on your customers' orders, in addition to all other logistic forms, and calculate all tax requirements per line item. **CyberMAC®** automatically creates A/P vouchers to vendors' fuel and freight invoices.

Rather than having to manually reconcile each purchase order with your accounting system, with **CyberMAC®** all orders are automatically streamlined directly into your accounting software.

CyberMAC® will consolidate all your orders and provide each driver a printed ticket or wirelessly transmitted specific delivery instructions, ensuring that all your customers receive their correct orders.

- Manual entry by the software user
- Automatic input/output made by the software

Cybermac Fuel Wholesaling software

makes your wholesaling job easier than you ever thought possible, getting rid of duplicate data entry errors. From a single entry of data, Cybermac produces a delivery order, Invoice, PO/manifest, freight voucher, excise tax records; and posts all inventory, sales, and general ledger accounts.

Tankwagon Fuel Distribution software

gives your gasoline, diesel & heating oil customers better service, while providing you increased control of your inventory and Tankwagon operations. Tankwagon Meter Automation transfers customer pricing and tax data to your delivery trucks and final delivery data to the office, eliminating errors and labor.

C-Stores and Consignment software

provides the ultimate in home-office accounting system for your convenience stores and consignment locations, completely integrating fuel transactions from purchase to sale.

Fuel Wholesaling

- **Prints a customer-friendly invoice** that shows taxes and freight for each line item, and shows net amount due after prompt-payment discount.
- **Calculates all invoice taxes line by line** and sets up the appropriate tax payable to the supplier or government.
- **Finds the lowest-price** supplier and terminal for a truckload of products.
- Assures that you **bill for all gallons** purchased.
- **Prints your month-end tax schedules**, using Crystal Reports.
- **Calculates the freight charges** on an invoice and creates an accounts payable voucher to the carrier.
- Automatically **creates a purchase order** to each manifest, complete with line item taxes.
- **Captures DTN prices automatically** and adjusts them for supplier differences.
- **Shows your gross profit** for each potential supplier and terminal.
- Provides **six different methods of pricing** fuel to customers

Tankwagon Fuel Distribution

- **Forecasts delivery needs** - based on degree day, date, day of the week, and past consumption.
- **Prints/transmit via wireless technology delivery tickets** for tanks in forecast range selected for delivery, complete with prices and taxes.
- **Assigns delivery ticket numbers** that correspond to invoice records created for them at the same time.
- **Accepts entry of gallons delivered** to complete the invoicing record.
- Displays or prints a **daily list of keep-full tanks** that need deliveries.
- **Posts completed ticket invoices** to Elliott Accounts Receivable.
- Provides **six different methods of pricing** fuel to customers
- Optionally **prints fuel invoices** to send to selected customers.
- **Posts all inventory**, sales, and general ledger accounts.
- **Sends digital data** to and from tankwagon for meter automation.
- **Maintains tank record** and delivery history for every customer tank.
